

EDWARD GEORGEVIC

Engineering and Management Student

www.linkedin.com/in/ed-georgevic-9749b9209  University Of Exeter

EXPERIENCE

Software Engineer Intern

Weatherite

 07/2025 - Present  Birmingham, United Kingdom

- Design UI components for software used in HVAC-focused workflows.
- Code parametric features and support development of 3D modelling software for HVAC systems.

Internship

AVON CAPITAL ESTATES

 06/2025 - 10/2025  Birmingham, United Kingdom

- Shadowed company co-owner during site visits, producing meeting minutes and actionable task summaries
- Participated in property management meetings with tenant occupiers on multi let industrial estates
- Assess and photograph/log completed repairs carried out by tenants
- Inspect condition of vacant units to satisfy insurance requirements
- Itemise areas on estates where landscape contractors had overlooked areas requiring attention

Intern

Scrivens Opticians

 05/2024 - 09/2024  Birmingham, United Kingdom

- Shadowed employees across multiple departments to gain insights into workflows and operational practices
- Analysed processes, identified inefficiencies and recommended improvements to enhance productivity and streamline operations
- Conducted meetings with staff and senior leadership to gather insights and validate findings
- Produced a comprehensive report for the CEO outlining actionable strategies for efficiency improvements

Website Designer

Freelance

 09/2023 - Present  Birmingham, United Kingdom

- Redesigned the ACE website working with CFO and Co -Founders to create a sharper and fresher, more user friendly easier to navigate platform
- Designed multiple websites for projects, receiving high honours.

Intern

OWL Optics

 05/2023 - 09/2023  Birmingham, United Kingdom

- I had the opportunity to work in different departments allowing me to test and develop my skills in every area
- My responsibilities included quality control as well as participating in meetings with new data, allowing me to learn how to communicate with contemporaries and senior staff.

Apprentice

Mersona

 05/2022 - 08/2022  Birmingham, United Kingdom

- Skilled in operating and maintaining manufacturing equipment
- Demonstrated my ability to work efficiently in a fast paced environment while showing attention to detail whilst achieving production targets
- Proven teamwork and communication skills, contributing to streamlined operations and consistent delivery of high quality products

SUMMARY

Engineering graduate with a first-class degree and a growing focus on software engineering. Currently working as a Software Engineer Intern, contributing to UI design, parametric coding, and 3D modelling software development for HVAC systems. Strong foundation in problem-solving, data analysis, and programming, with experience in Python, CAD/CAM, and Excel. Confident in technical report writing, teamwork, and communicating complex ideas clearly.

KEY ACHIEVEMENTS

Python Projects

Completed multiple coding projects with python, integrating engineering mathematics and physics into programming

Designed Offshore Research Station

Helped design a tidal lagoon offshore energy capture platform

LiDAR Business Design

Helped create a hypothetical business harnessing the use of LiDAR to increase accessibility in snow sports clothing.

Engineering Report

Produced an experiment to evaluate properties of materials using the three point bend test.

Designed a Water Saving Device

Alongside my team, we designed a leak detector capable of detecting humidity and water to detect leaks
